Vivek Pradhan

Full-Stack Developer

Jamshedpur, Jharkhand | **+91 6203046018** | vivekpradhan.tech | linkedin | github | vivekpradhan736@gmail.com

Education:

- **Gurukul Kangri Vishwavidyalaya (Deemed to be University), Haridwar**   **2021 - 2025**
  - ➤ B. Tech in Computer Science and Engineering
  - ➤ CGPA: 7.6 (as of 5th Semester)
- **Koncept Public School, Chakradharpur, Jharkhand**   **2021**
  - ➤ Class XII Score: 81.0%
- **Madhusudan Public School, Chakradharpur, Jharkhand**   **2019**
  - ➤ Class X Score: 78.0%

Project Experience:

1) GenZgram (Social-Media)   *Github Link* | *Live Link*
- **Developed** a scalable and high-performance Social Media app using React.js and React Query.
- As a React.js developer, I spearheaded the creation of a social media web application, leveraging the power of React.js, Tailwind CSS, Appwrite, and React Query to deliver a seamless user experience.
- **Implemented** secure user **authentication** and **authorization** using **Appwrite's** authentication services and **JWT tokens** for session management.
- **Integrated** real-time notifications to keep users informed about new messages and activities, improving user engagement.

2) FastChat (Chat-App)   *Github Link* | *Live Link*
- **Developed** a feature-rich Chat Application clone using React.js and Socket.io, emphasizing real-time communication and seamless user interaction.
- **Implemented** robust authentication and authorization mechanisms using **JWT tokens**, ensuring secure sign-in and sign-up processes.
- **Supported** one-on-one chat and group chat functionalities, enhancing the app's versatility for different communication needs.
- **Integrated** real-time notifications to keep users informed about new messages and activities, improving user engagement.

3) Task-Manager   *Github Link* | *Live Link*
- **Developed** a Task-Manager clone using Next.js, focusing on efficient task management and user productivity.
- **Implemented** secure authentication and authorization using JWT tokens, ensuring user data privacy and secure access.
- **Enabled** features such as task creation, editing, deletion, and prioritization, allowing users to manage their tasks effectively.

Technical Skills:

- **Languages**: C, C++, Python, Javascript, Typescript
- **Frontend**: React.js, Next.js, Redux, Tailwind-CSS, Bootstrap, OAuth, Next-Auth, React-testing-library
- **Backend**: Node.js, Express.js, Rest-Api, React Query
- **Database**: MySQL, MongoDB, Firebase, Docker Engine, Supabase
- **Tools:** VS Code, Git, GitHub, Figma, Command Line Interface, Jupyter Notebook, Postman, Linux (Familiar)
- **Computer Fundamentals**: Data Structures and Algorithms, OOPS, Computer Networks, Operating Systems, Database Management System

Additional Experience:

Blogs writing :-
1) **How to Build and Publish Your First React NPM Package.**   *Medium Link*
   - ➤ **Explained** the step-by-step process of creating and publishing a React NPM package, making it accessible for developers of all levels. **Highlighted** the importance of reusable components and how to effectively contribute to the open-source.
2) **What's the Difference Between localhost and 127.0.0.1?**   *Medium Link*
   - ➤ **Explored** the technical differences between localhost and 127.0.0.1, demystifying common misconceptions for developers.

Problem Solving :-
1) **Leetcode**   *Leetcode Link*
2) **Geeksforgeeks**   *Geeksforgeeks Link*
